

**Report about the Rotary PolioPlus Lebanon Committee 2014-2015 Support to
the Lebanon Polio Immunization Campaign
In partnership with the Global Polio Eradication Initiative (GPEI), Ministry of
Public Health (Lebanon), UNICEF and WHO
- October & November 2014, Lebanon –**

**Presented by: Dr. Badreddine Ghazzaoui,
Chairman of Lebanon Rotary PolioPlus Country Committee (Lebanon), 2014-2015
Ghazawib1@hotmail.com
December 2014**

Introduction

On October 14th, 2014, The Ministry of Public Health of Lebanon, represented by Minister Wael Abou Faour, in collaboration with UNICEF and the World Health Organization (WHO), launched a national immunization campaign to combat polio¹ in Lebanon. Following the resurgence of polio in the Middle East with the discovery of new cases in Syria in October 2013 and Iraq in 2014, an anti-polio campaign was launched in several countries in the Middle East including Lebanon, where Lebanon had become “extremely susceptible” to a polio outbreak, according to the Minister.

The campaign intended to target 570,468 children in all governorates of Lebanon, including Syrian children and children from other nationalities living in Lebanon (e.g. Palestinian, Iraqi). The first phase lasted from October 14 to October 21st, 2014 and the second lasted from November 15th to 21st, 2014. Vaccinations were given for free to all children.

Figure 1: Minister of Public Health of Lebanon, Mr. Wael About Faour, at launch of National Polio Campaign

¹ Polio is a highly infectious disease caused by a virus. It invades the nervous system, and can cause total paralysis in a matter of hours. The virus is transmitted by person-to-person spread mainly through the faecal-oral route or, less frequently, by a common vehicle (e.g. contaminated water or food) and multiplies in the intestine. Initial symptoms are fever, fatigue, headache, vomiting, stiffness in the neck and pain in the limbs. One in 200 infections leads to irreversible paralysis (usually in the legs). Among those paralyzed, 5% to 10% die when their breathing muscles become immobilized. The disease is entirely preventable by vaccination to children aged 1 day to 5 years.

Rotary's contribution to polio eradication globally

Rotary launched its PolioPlus program in 1985 and became in 1988 one of the spearheads of the Global Initiative for the polio eradication with WHO, UNICEF and the US Centre for Disease Control. Since then, the number of cases of polio in the world has decreased by more than 99%.

In July 2014, Rotary announced that it will give an additional \$ 43.6 USD million to fund immunization activities, monitoring and research carried out by the Global Polio Eradication Initiative to end the disease by 2018. Part of this sum, 15.1 million USD, will fund eradication efforts in the Eastern Mediterranean region.

The work of Rotary focuses on advocacy, fundraising, volunteer mobilization and awareness of the public. Rotarians have thus allocated more than \$ 1.2 billion USD and devoted countless volunteer hours to combat polio.

Rotary's contribution to polio eradication in Lebanon

Rotary joined the National Polio Immunization Campaign through a contribution of volunteers on 'recreational days' during the campaign, and medical doctors to vaccinate the children. The idea was for Rotarians and RotarActors to join UNICEF and WHO in the immunization days in several locations of Lebanon (Tripoli, Miniyeh Danniye, Mizira, Bebnine, Baalbek, Beirut, Saida, and Iklm el Kharoub) and give out gifts and school supplies to the children coming to get the vaccine. In two locations (Miziara, and Saida), Rotarians Dr. Michel Jassar, Rotary International Representative to the United Nations (ESCWA) and District 2452 Polio Chairman, and Dr. Badreddine Ghazzaoui, Chairman of Lebanon Rotary PolioPlus Country Committee for 2014-2015, both medical doctors, administered the vaccinations themselves, as only medical staff are entitled to administer the vaccines on the children. In addition to this, Rotary supported the campaign with raising awareness, by sending press releases to newspapers, and using social media.

Figure 2: Rotary International Representative to the United Nations (ESCWA) and District Polio Chairman Dr. Michel Jassar vaccinating children in North Lebanon

Figure 3: Chairman of Lebanon Rotary PolioPlus Country Committee, 2014-2015, Dr. Badreddine Ghazzaoui

To coordinate Rotary’s engagement with UNICEF, WHO, and the Ministry of Public Health of Lebanon, and its overall support to the national campaign, the District Governor for district 2452 in 2014-2015, Mr. Khalil Al Sharif [Bahrain], appointed a committee of Rotarians from all governorates of Lebanon. The committee set for itself the strategy to:

- Coordinate with UNICEF and Ministry of Public Health to receive information and disseminate it within the Rotary and Rotaract circles;
- Secure the funds to buy the supplies of the goody bags;
- Buy all contents of the goody bags;
- Promote the campaign through the use of bibs, banners and electronic media.

Figure 4: RotarActor Nader Houella and fellow RotarActors in Beirut vaccination event.

In addition to this, an Advisory Committee was established, whose main task was to coordinate the work of the Rotary Committee in Lebanon and liaise between the polio campaign in the district and the zone, and ensure alignment with the directives of Rotary International.

Below is the list of Rotarians/RotarActors who took a leadership role in the Rotary PolioPlus Committee for 2014-2015:

Rotary Club	Name of Rotarian/RotarActor
Beirut Cedars	Dr. Badreddine Ghazzaoui, Chairman of Lebanon Rotary PolioPlus Country Committee, 2014-2015
Beirut	Mr. Nabil Kronfol
Tripoli	Ms. Oula Ahdab
Kesrouan	Mr. Antoine Salame
Tripoli Maarad	Mr. Bachir Zaouk
Beirut Center	Ms. Souha Labban Khatib
Tripoli Cosmopolis	Mr. Georges Azar
Rotaract Clubs	Mr. Nader Houella

Members of the PolioPlus Advisory Lebanon Committee 2014-2015 are:

- PDG Farid Gebran, EPN Zone 20B Coordinator
- PP Joseph Rachkidi, EMR Chair 2014-2015 [Lebanon]
- PP May Monla Chemaytelly, DDG
- PP Michel Jazzar, District 2452 Polio Chairman

Figure 5: Promotional material in Shhim, Iklim area.

It is also important to mention that for the first time ever, Rotary got such a visibility in the polio campaign as an official partner, as Rotary's logo appeared on the various promotional materials such as banners and bips worn by key staff, volunteers and medical doctors during the campaign, and flyers given out to parents in clinics and vaccination events.

Results achieved in the national campaign

Results of the October part of the campaign² revealed that the percent of target achieved during the Polio Immunization Campaign in October 2014 is at 90%, the proportion of non-Lebanese (Syrians & others) among the total vaccinated children is at 48%. In addition to this, more than 300 physicians from across Lebanon participated in this campaign, and they vaccinated 30,000 children so the total percentage reached, out of the target, is 96%. This represents an immense success for the Ministry of Public Health, UNICEF, WHO and Rotary.

Below is the schedule of events in which Rotarians from across the country organized the recreational days to support the National Immunization Campaign in October and November 2014:

Town	Date of vaccination day	Location
Tripoli	15th of October	Rachid Karamé Fair
Miniyeh Danniyeh	16th of October	Primary School of Deir Aamar
Bebnine	17th of October	Municipality of Bebnine
Miziara	22nd and 24th of October	Kids nursery and public school
Baalbek	20th of October	Ras El Ain place
Beirut	17th November	Sporting Club (Nadi Riadi, near Hammam Askari)
Saida	19th of November	Municipality of Saida
Iklim el Kharoub	20th of November	Shhim Cultural Centre

² As of the writing of this report (December 2014), the national campaign's November results were still not available. Still, the October results are very indicative of the success achieved in this campaign, which stands at 96% of targeted children.

Achievements by region in Lebanon

North Lebanon

Recreational days took place in Tripoli, Mina, Bebnin and Miziara. The political and security situation did not allow our Rotarian fellows to go to Mina and Bebnin, so they participated only in the Tripoli campaign on October 15th, 2014. During the recreational day, there was a comedy show for the children (organized by UNICEF), and then the vaccinations took place. More than 500 children were vaccinated. Rotarians raised awareness, contacted NGOs, some schools, and the municipality.

In Miziara, Dr. Michel Jazzar, Rotary International Representative to the United Nations (ESCWA) and District 2452 Polio Chairman, vaccinated children along with the Caza Medical Chief in a kids' nursery and a public school on October 22nd and 24th, 2014.

Figure 6: Rotarians in Tripoli, north Lebanon.

Where are we in the fight to end polio? How can we make history together? Take action, Miziara, Lebanon. #WorldPolioDay

How a Rotarian spent 24th October world polio day @RCBeirutCedars @rotary @therotarian @EndPolioNow #RotaryDay

Lebanon

Figure 7: Campaign promotions on Twitter by Dr. Michel Jazzar

East Lebanon

Due to the security situation in Baalbeck, Rotarians were able to participate in the campaign only in Zahle, on October 20th, 2014. Participation in the recreation day was modest, because the vaccinations were mostly done in public schools, and in private clinics and in dispensaries. Rotarians contacted the municipality there (Maha Kassouf is a member of the municipality and member of the Rotary Club also). To organize the recreation day, Rotarians contacted the municipality and the health authorities in Zahle to organize the recreation day and the campaign as a whole.

Figure 9: Rotarians on vaccination day in Zahle, East Lebanon.

Mount Lebanon

In Ikleem (Shhim), Rotarian posted campaign promotional materials on main roads in Shhim. The vaccinations were done in the Cultural Auditorium on November 20th, 2014, in addition to a puppet show. The vaccination being the responsibility of WHO and UNICEF, Rotarians offered gifts to the children

(coloring books and pens with Rotary logos and bags of snacks and juice).

Figure 8: Rotarians in Shhim, Iklm area, on vaccination day.

Schools from the area brought the children according to a set schedule, every hour children left and others came. About 1,300 children were brought to be vaccinated on that day.

Beirut

In Beirut, the campaign was held in the Sporting Club (Nadi Riyadi) on November 17th, 2014. Children from different schools with their teachers gathered to receive the polio vaccine. Rotary distributed coloring books and coloring crayons with the Rotary logo, and snacks in a bag (juice, cookies, and candies) to over 180 children present.

The event gathered up to 200 school students from various private schools in Lebanon. It was a recreational event which aimed to raise awareness on the polio disease in Lebanon while at the same time provide a number of students with needed vaccinations.

At first, the students were divided into groups of 20, and each group had a facilitator who provided entertainment in the form of songs and games. Afterwards, students were given vaccinations from doctors present. During that time, members of the Rotary and Rotaract family were preparing the goody bags for the students. The bags contained: a stationary set and a combination of juice, sweets and chocolate.

Figure 10: Children in Beirut being vaccinated.

South Lebanon

Figure 11: Dr. Badreddine Ghazzaoui with children on vaccination day.

In South Lebanon, vaccinations were done in the city of Saida. On the 15th of November, vaccinations were organised in 4 hospitals in Saida: Rai Hospital, Dallaa Hospital, Kassab Hospital, and the governmental hospital, and the recreation day took place on the 19th of November in the Municipality of Saida.

Rotarians contacted pediatricians in those hospitals reminding them about the importance of vaccination against polio.

Mr. Ali Jalaeddine, member of the polio committee of Rotary Club Beirut Cedars, and volunteer in the PolioPlus Committee, and PP Badreddine Ghazzaoui contacted the President of the municipality Mr. Mohamad Saoudi, Chairman of the Health Department of South Lebanon, Dr. Hassan Alawiyyeh, and Caza medical doctor, Dr. Bilal Abdallah, and the Governor of South Lebanon, Mr. Mansour Daou. They arranged the recreation day which happened in Saida and shared with them all the brochures and fliers, which they also distributed in dispensaries, banks, and major businesses in town.

The recreation day in Saida on November 19th was held in Municipality of Saida. Rotary contacted the Chair of the School Network in Saida, Mr. Nabeel Bawwab, who gathered 500 children in the municipality. There was a comedy show for the children, done by UNICEF. Present was UNICEF representative Mr. Zahra Nouredine, WHO representative Ms. Ramziyyeh Sabbah, and the Ministry of Public Health representative Ms. Sabah Mansour. Dr. Ghazzaoui (Chairman of Lebanon Rotary PolioPlus Country Committee, 2014-2015) vaccinated 300 kids, and gave them gifts. The campaign in Saida was a

great success. The second day another 200 kids were vaccinated, and another 200 were vaccinated on the 3rd day. In addition to this, four NGOs vaccinated kids in community organizations (such as Moasaat organization) and some children were vaccinated in private clinics in South Lebanon.

Word of thanks

Rotary's participation in Lebanon's National Polio Immunization Campaign is a perfect example of how Rotary supports national efforts to preserve the health and wellbeing of our children, and how Rotary is an active player in our communities.

A million thanks are first and foremost to the Ministry of Public Health and UNICEF and WHO, for their superb collaboration with us and to Dr. Joseph Rashkidi, EMR Chair 2014-2015 and Dr. Michel Jazzar, District 2452 Polio Chairman for their continuous support.

Thanks are also due to past District Governor Mr. Farid Gebran, EPN Zone 20B Coordinator.

Also thank you so much to the Polio Committee of Rotary Club Beirut Cedars, Mr. Roni Farra, Ms. Rima Khalaf, and Mr. Ali Jalaeddine and to the whole club of Beirut Cedars. Also thanks to all Rotary clubs in Lebanon who took part in the polio campaign, especially RotarActors and volunteers, and the medical doctors who actively participated in our work.

Also thanks so much to members of the PolioPlus Country Committee for 2014-2015: Mr. Nabil Kronfol, Ms. Oula Ahdab, Mr. Antoine Salame, Mr. Bachir Zaouk, Ms. Souha Labban Khatib, Mr. Georges Azar, and Mr. Nader Houella.

Also thanks to municipalities in Lebanon, health departments in the regions, and governors for their support, and to the media (newspapers, social media, etc) who helped us promote the campaign, for the benefit of the children in Lebanon.

Much gratitude goes to the District 2452 Governor Mr. Khalil Al Sharif for his trust in our leadership, and we hope that the responsibility entrusted to us has raised the name of Rotary in Lebanon even further. In our eyes, the greatest achievement of Rotary's contribution to this campaign is in the great and very positive participation by the population in Lebanon, whether Lebanese or non-Lebanese, and also the fact that every volunteer, medical doctor and staff has carried the name of Rotary on their bip, flyer and banner. This was a great accomplishment which we are all proud of.

Dr. Badreddine Ghazzaoui, Chairman of Lebanon

Annex 2 - Directives to Rotarians physicians

It is known that Rotary in Lebanon through Rotary, Rotaract and Interact clubs and Inner wheel Clubs as well would be also helping us in terms of the National Polio Campaign 2014, our support as Rotarians physicians [doctors] is highly needed in the following:

- 1- To ask all Rotarian physicians to support the campaign that will take place from 15 to 21 Oct and 15 to 21 Nov. 2014 all over the Lebanese territories.
- 2- To kindly ask all Rotarian physicians to comply to the said campaign by vaccinating through their clinics all targeted children with OPV.

I urge all our physicians and Rotarians to receive the said vaccine directly from MOPH central drug warehouse and distribute it in to all pertinent physicians who will give to Rotary polio committee Lebanon back the results to be integrated within the Polio campaign report.

Thank you for your support,

13 october 2014

Dr Badreddine Ghazzaoui

Chairman of Rotary PolioPlus Lebanon 2014-2015

Annex 3 - To Rotarians physicians and pediatricians

In particular at this time the role of private and public service physicians is important and nowhere more vitally than in Lebanon. The role of physicians in Lebanon and the Region is important in:

1. AFP Surveillance
 - a. Rapid reporting of all AFP cases (acute flaccid paralysis ,not just "suspected polio")
 - b. Cooperation with MoPH in investigation and laboratory sampling
 - c. Encouraging parents of AFP cases to cooperate with investigation and follow up
2. Supplementary Immunization Activities
 - a. Partnership with MoPH in advocating for all children to be vaccinated with OPV regardless of vaccination history (OPV +/- IPV)
 - b. Active participation in the campaigns
3. Routine Immunization Services
 - a. Partnership with MoPH on implementing agreed routine immunization schedules (e.g. sequential IPV/OPV in the case of Lebanon)
 - b. Advocacy with patients and the community for high routine polio coverage as the best defense against polio for the individual and the community

يتوجهون لجانبكم الكريم بأعقب التمنيات بالصحة والعافية ويتمنون تعاونكم الميمون من اجل
انجاح مضمون هذه الرسالة.

من خلال دعمهم ومشاركتهم في الحملة الوطنية للتلقيح ضد شلل الاطفال التي
تقيمها منظمة الامم المتحدة للطفولة (اليونيسف) ووزارة الصحة العامة في لبنان،
ومنعا للعواقب التي تهدد سلامة اطفالنا والتي قد تنتج عن عدم الوصول لكل طفل
دون الخامسة في منطقتنا،

نتمنى على جانبكم الكريم التعاون معنا لانجاح هذه الحملة وحث المواطنين للقيام
باحضار اطفالهم الى المراكز المعلنه من قبل وزارة الصحة العامة للحصول على التلقيح
بما يؤمن حمايتهم من هذا المرض الخطير والحد من امكانية تفشيه.

ذلك من خلال:

-تعليق اللوحات الداعمة للحملة؛

-قراءة المنشورة المرفقة للمواطنين.

كما نود ان نشير الى اننا بصدد اقامة ندوات او لقاءات حول هذا الموضوع مع اشخاص
مؤهلين لذلك في الرعايا والمجتمعات الراغبة من اجل تقديم اية ايضاحات او تساؤلات
عن هذا الموضوع وأهداف هذه الحاجة الملحة .

نتمنى على من يرغب في اقامة هكذا لقاء في منطقته ان يبادر الى الاتصال بالسيدة ريتا
مقدسي في بلدية زحلة-معلقة وتعنايل على الرقم: ٠٨ ٨٢٠ ٢٢٥

كما نود ان ندعوكم للمشاركة في اللقاء الاول لاطلاق هذه الحملة في منطقة زحلة والبقاع
وذلك يوم الخميس الواقع فيه ٢٠ تشرين الاول ٢٠١٤ في تمام الساعة الخامسة من بعد الظهر
في مقر منتدى المتعدين- زحلة

شاكرين تعاونكم مسبقا
متمنين لكم دوام الصحة والعافية،

PLAYING A PART IN THE FIGHT: Rotary member Nora Haddad

Rotary member Nora Haddad assists with a National Immunization Day in Lebanon.

Though Syria had been polio-free since 1999, an outbreak was identified in October 2013. It is believed that the virus was imported to Syria from Pakistan as a result of the influx of foreigners from Pakistan and the chaos in Syria due to the ongoing war.

Large immunization efforts were conducted out of fear that the virus would spread to the Middle East. With approximately 1.5 million Syrian and Iraqi refugees, a weak health care system, lack of clean water and proper sewage systems in refugee settlements, Lebanon is most at risk to the threat of polio.

The Polio-Lebanon committee, established in October 2013 and chaired by Dr. Joseph Rachkidi and Dr. Bader Ghazzawi, was involved in National Immunization Days in 2014. As a member of the Rotary Club of Beirut Cosmopolitan, I was happy to volunteer alongside members from the Rotaract club of Beirut, the Rotaract club of Metn, UNICEF, WHO and MOPH (Ministry of Public Health) in the Beirut campaign.

During the Beirut campaign I took part in a very successful National Polio Immunization Campaign at the Sporting club in Manara on November 17. Over 130 children under the age of five, from three Beirut schools were immunized by health specialists. Nader Houwalla from Rotaract of Beirut, a member of the Polio-Lebanon committee, coordinated the event with Rindala Berro from UNICEF.

We provided coloring books, crayons, and goody bags provided by Rotary Lebanon thanks to a grant from the Polio Plus program partners. The Rotary Clubs of Lebanon provided snacks and refreshments for the children. While children were receiving the vaccinations, the others had their faces painted, watched skits, or played games.

It was rewarding to see that that the children and teachers alike were so happily surprised by all of the gifts and entertainment provided. All I needed was to see the smiles on the children's faces after they received the two drops of the vaccine.

All of the volunteers had a wonderful experience, which was reinforced when we received a very warm note expressing gratitude from the school's principal. I walked away from the experience feeling as though we were like a big family; I am really looking forward to the second round of immunizations in April.
